SKILLS SUMMARY

- **Languages:** C, Java, JavaScript
- **Frameworks:** HTML and CSS, Bootstrap, Springboot, React, Hibernate, JDBC
- **Tools/Platforms:** MySQL, MongoDB, Postman, Github
- **Soft Skills:** Problem-Solving Skills, Team Player, Communication, Project Management, Adaptability

EDUCATION

- **SSBT College of Engineering and Technology** Maharashtra, India
• *Bachelor of Engineering - Computer Engineering; CGPA: 7.30* August 2022 - May 2026
• *Favorite Courses: Object Oriented Programming, Data Structures, Analysis Of Algorithms*
- **J.E. School and Jr.College** Muktainagar, Maharashtra
• *HSC Percentage: 83.33%* 2021 - 2022
• *Favorite Courses: Physics, Chemistry, Mathematics, Computer Science*
- **J.E. School and Jr.College** Muktainagar, Maharashtra
• *SSC Percentage: 85%* 2019 - 2020

EXPERIENCE

- **Fuel (Friends Union Emerging Lives)** Onsite
• *Java Developer Intern*
 - **Project Overview:** Developed product catalog functionality using Java, JDBC, MySQL, CRUD operations, and Postman, including database connectivity, product management, and REST API testing.
 - Debugged application issues and fixed database and backend-related errors.
- **Dabotics India pvt Ltd** Online
• *Frontend Intern* March 2025
 - **About:** Collaborative programming project with a team of 2 people.
 - **Project - Railway Ticket Booking:** Developed a working prototype of a website that could let an individual select his own seat while booking train tickets.
 - **Tech stacks used:** The project was developed using HTML, CSS, and Javascript/React js.
 - **Github Repository Link:** github.com/vaibhavkedar888/Train-seat-booking

PROJECTS

- **FarmerConnect - Farm Equipment Rental Platform:** Developed a full-stack web application for renting agricultural equipment, connecting farmers with equipment owners.
Designed and developed responsive React.js frontend components for user registration, login, equipment listing, search, and rental management.
Developed RESTful APIs using Java and Spring Boot for user management, equipment management, rental requests, and booking operations.
Implemented CRUD operations for managing users, farm equipment, rental details, availability, and booking records.
Tech: React.js, Java, Spring Boot, MongoDB, Postman
- **Zerodha Clone - Trading app:** Developed a stock trading dashboard with watchlist, holdings, positions, orders, and management features. Created interactive stock visualizations using Chart.js and implemented responsive UI components using React.js and Material UI.
Tech: React js, REST APIs, Axios, Material UI, Chart.js.

ACHIEVEMENTS

- **HackerRank Silver Badge in Java :**
successfully solving Java programming and problem-solving challenges.
- **HackerRank Bronze Badge in SQL :**
demonstrating proficiency in SQL queries, data retrieval, filtering, and database problem-solving.
- **Served as a Coordinator for the SSBT Ignite College Club:**
contributing to event coordination, team collaboration, and student activities..
- **Finalist in a College-Level Hackathon:**
demonstrating problem-solving, teamwork, and technical skills.

CERTIFICATIONS

- Certification of Java - Apna College.
- Certification in React js by Linkedin
- Power bi - PWC [Forage]
